

# SOFTWARE DEVELOPMENT

**Keep your business abreast of advancements in software development.**

Software Development is an avenue that is defined by innovation, with new solutions in the form of tools, products and apps being developed and implemented daily. With this comes a number of languages, tools and skills that organisations should be familiar with to be able to monitor, identify trends and plan strategically. Deviare's Software Development courses offer specialised learnings that allow your organisation to steer towards success.

## OUR TRUSTED PROGRAMME PARTNERS

**Caltech** | Center for Technology & Management Education

**IIT KANPUR**  
Indian Institute of Technology Kanpur

## Explore our Software Development Master's Programmes

#### Python Training

★ 4.30 (1616 Ratings) | 4K Learners

## Enhance your workforce with critical digital skills.

There can be no digital transformation without the transformation of skills to new and modern areas. We know that it takes more than simply staff training to improve a workforce's abilities. Deviare's learning platform provides an adaptable, continuous learning experience with effective feedback loops tailored to each individual's needs. Organisations must invest in the ongoing development of skills that fulfil technical certification criteria while also covering enough of the business environment to be valuable for the organisation.

We provide corporate training in the emerging technologies that are transforming our economy. Our Adaptive Learning Platform can curate customised learning while accommodating for large candidate volumes. The workforce skills transformation produces an applied skill with the appropriate accreditation, where applicable.

Are you looking to up-skill or re-skill your employees so that your organisation can prosper in the digital age? Get in touch.
